

MERN STACK BOOTCAMP 2026 LAB ASSIGNMENT | FULL STACK PROJECT

Scenario – Pharmacy Management System

Team Members

- Sivaganga S Nair
- Arya A
- Ananthu Unnitthan

Problem Statement: A pharmacy requires a MERN stack application to manage medicine inventory, medicine sales, and supplier information. The system should allow users to add records and view all records for each module.

Module 1 – Medicine Inventory (Add Medicine / View Medicines)

Required Functionalities

- API 1 (POST): Add Record
- API 2 (POST): View All Records
- React Page 1: Add Page
- React Page 2: View Page

#	Field Name
1	Medicine ID
2	Medicine Name
3	Category
4	Manufacturer
5	Batch Number
6	Manufacturing Date
7	Expiry Date
8	Dosage
9	Purchase Price
10	Selling Price
11	Stock Quantity
12	Supplier Name
13	Shelf Number

Module 2 – Medicine Sales (Add Sale / View Sales)

Required Functionalities

- API 1 (POST): Add Record
- API 2 (POST): View All Records
- React Page 1: Add Page
- React Page 2: View Page

#	Field Name
1	Bill ID
2	Medicine ID
3	Medicine Name
4	Batch Number
5	Pharmacist Name
6	Prescription Required
7	Doctor Name
8	Quantity
9	Unit Price
10	Total Amount
11	Sale Date
12	Payment Method
13	Billing Counter Number

Module 3 – Supplier Management (Add Supplier / View Suppliers)

Required Functionalities

- API 1 (POST): Add Record
- API 2 (POST): View All Records
- React Page 1: Add Page
- React Page 2: View Page

#	Field Name
1	Supplier ID
2	Supplier Name
3	Company Name
4	Email
5	Phone Number
6	Address
7	Contact Person
8	City
9	State
10	Pincode
11	GST Number
12	Registration Date
13	Supplier Code

Submission Requirements

- GitHub URLs of Frontend and Backend repositories
- Screenshots of APIs tested in Postman/Thunder Client
- Screenshots of Add and View pages
- Minimum 5 records in each module
